Sloshing mesh sensitivity | same physics, dt = 0.5 ms
ANSYS Fluent | profile at 1.20 s
OpenFOAM 14 | profile at 1.20 s
80 x 40 (3,200 cells)
160 x 80 (12,800 cells)
Depth minus 50 mm (mm)
Strip centre x (mm)
Right-wall strip: x = 197.5 to 200 mm
Physical time (s)
Matched-strip fine minus coarse differences
Maximum over 80 strips
RMS over 80 strips
Absolute depth difference (mm)
Fine columns averaged into the same 2.5 mm strips. Two grids do not establish mesh independence or physical validation.
